

IN-FLIGHT MENU

Satellite- based services soon, internet speeds of just 256-512 kbps for now.

Speeds good enough for SMS, surfing, WhatsApp, email

Video quality will be patchy at best, no gaming either. Wait till network quality improves

Terrestrial networks on trial too. Speed can go to 8-10 Mbps. Seamless Air Alliance using satellites will also give similar speed, but after 2019

Costs likely to be high. Singapore Air packs start at \$5 for economy, 100MB free for 1st/business pax

Voice calls will be possible, so good idea to keep earplugs handy!
